

# Aha Halo Program Description

( 2026-2-12)

## 1. General Principles

The effectiveness and duration of the programs may vary among individuals, depending on their physiological state, lifestyle habits, and baseline health conditions.

- For acute symptoms, it is recommended to use Aha Halo continuously during the day until improvement is felt. For chronic conditions, long-term and consistent use is often necessary, as the time and complexity of the health issue may influence the recovery process. In all cases, it is advised to complete multiple full treatment cycles to consolidate the results.
- Except for sleep-related programs, we recommend turning off the device at night when running other programs. This allows your body time to restore its natural functions. Our ultimate goal is to empower your body's innate ability to heal, so that one day, you may no longer need external support—because true wellness comes from within.

- All wellness programs, such as Holistic Body Care, require consistent and long-term use, combined with a healthy lifestyle that includes a balanced diet, moderate exercise, and good sleep habits. The core goal is to support the body's natural balance and promote overall well-being through systemic regulation, helping you feel your best over time.

**Diet:** Increase whole grains and dark leafy vegetables, while reducing refined sugars, trans fats, and meat consumption.

**Exercise:** Engage in moderate activities, such as brisk walking or swimming, on a weekly basis.

**Recovery:** Aim for 7-8 hours of high-quality sleep each night and avoid blue light exposure before bedtime.

- During the use of Aha Halo, some individuals may experience mild reactions, such as dry mouth, which can be a normal part of the body's adjustment process. To support your overall well-being, we recommend maintaining good sleep habits, eating a balanced diet, reducing stress, avoiding smoking and alcohol, and drinking plenty of water. These practices can help optimize your experience with the program.

## 2. Specific Guidelines

### Comfort

To enhance your experience, try to minimize physical strain—avoid prolonged sitting or heavy lifting while using these programs.

## **Beauty**

Pair these programs with a simple skincare routine: use SPF 30+ sunscreen, add antioxidant care, and gently massage your scalp while avoiding harsh styling.

## **Cleansing**

Support your body by reducing exposure to environmental toxins (like plastics and heavy metals), drinking plenty of water, eating more fiber, and staying active with moderate exercise.

## **Emotional Wellbeing**

For emotional well-being programs, take 10-20 minutes daily for mindfulness practices like breath observation or gratitude journaling. Stay positive, practice gratitude, and focus on one task at a time to reduce stress and enhance mental clarity.

## **3. Disclaimer**

While Aha Halo incorporates advanced technology, it is intended for experimental and educational purposes only. Aha Halo is not designed to diagnose, treat, cure, or prevent any disease or medical condition. Instead, it aims to support overall well-being, promote relaxation, and enhance vitality. Use Aha Halo as a complementary tool to support your lifestyle, and consult a qualified healthcare professional for any medical concerns or conditions. Individual results may vary.
